Checkout the Panasonic Phone System Manager TODAY!
Ask your Panasonic certified dealer for details.

□ System Self Management

Phone System Manager (PSM) gives you control of you Panasonic KX-TD1232 or KX-TD816 telephone system. By investing in this **dealer installed** software you can make the following simple day to day programming changes to your system from you desk or a laptop PC.

- Telephone Extension Name & Number
- Call Forwarding
- Do Not Disturb
- Speed Dial Numbers
- Print telephone labels
- And so much more...

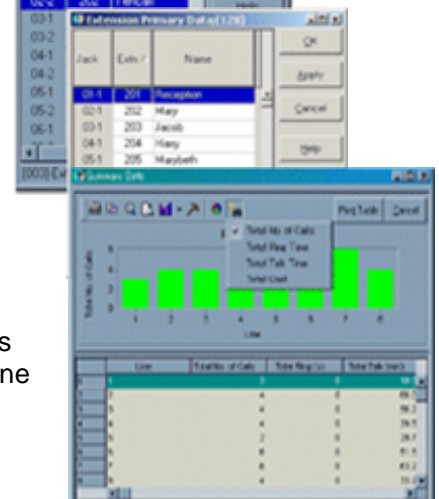

PSM has a built in program to print quality designation labels, making it a simple task to keep the telephones in your business up to date with the system programming changes.

□ Accounting / Cost Management

In addition to traditional cost management, PSM can collect and analyze call accounting data – providing you with extensive reporting – both built-in as well as customized reports for virtually all your needs.

Panasonic Phone System Manager (PSM) software - a remarkable product for Panasonic PBX (KX-TD816/KX-TD1232) users. PSM brings telephony system management and traditional call accounting - all in one easy to use package – making the Panasonic PBX a much more attractive investment while helping to lower your cost of ownership.

NOTE:

- PSM software requires: Windows 98SE, ME, 2000, XP
- Your Dealer can assign a special access privilege - allowing you to make changes to your telephone system on your own.
