# KX-A281 Phone System Manager (PSM)

Panasonic Phone System Manager (PSM) gives you enhanced control of your Panasonic KX-TD1232 or KX-TD816 telephone system.

A modest investment in this dealer-installed software gives you the ability to easily make day-to-day programming changes to your system from your desktop or laptop PC. This includes adding and deleting names in the system speed dial list, or changing the directory name of a telephone. In addition, PSM has a built-in program, which lets you directly print your telephone designation labels, making it easy to keep the telephones in your business updated with the latest system programming changes.

PSM also includes a built-in call accounting program, which is a useful tool for analyzing and reporting on PBX activity, including trunk usage, lost calls, and busy incoming call periods. This enables you to adjust your Panasonic PBX system for efficient and cost-effective operation. And if you bill back clients for time spent on the telephone on their behalf, PSM will keep track of these calls, so that, at the end of the month, you will be able to easily generate an accurate bill to submit to your clients.

System Recommendation	
OS	Windows® 2000 (SP2)
CPU	Pentium®III 450MHz or higher, or equivalent CPU
RAM	128 MByte or more
HDD	Total disk size is 20 GByte or more, of which at least 20% is free

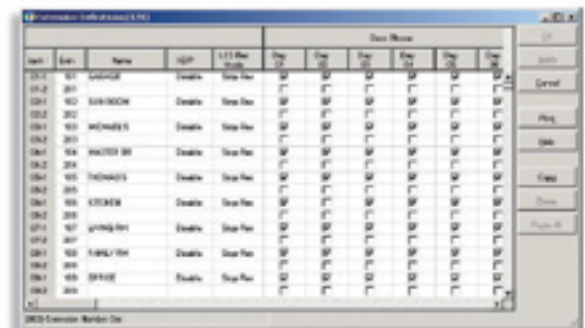

Windows is either a registered trademark or a trademark of Microsoft Corporation in the United States and/or other countries. Pentium is a registered trademark of Intel Corporation or its subsidiaries in the United States and other countries.
